The Chinese have known for many years that there was gold in the mountains of Taishan, in the province of Shantung. They realized the extent of it when some men who had worked in the mines and mills in California began prospecting and discovered a bonanca. They erected a rude mill and from the outset the production of gold was enormous. They claim that not a ton of ore taken out has yielded less than \$700, while much of it has run into the thousands. The matter was kept quiet and a big stock company formed that obtained control of about eighty miles of land in the vicinity, and the two Chinamon now here were sent to this country to make preliminary arrangements for the purchase of machinery, etc., and also to float a certain portion of the stock. DR. CANTLIE ON THE FEVER COM MISSION'S RECOMMENDATIONS.

The following migute by Dr. Cantlie on the recommendations of the Fever Commission was laid on the table at the last sitting of the Sani tary Board :-

I. The first recommendation is that subsoil drainage be proceeded with at once. Although there may not be much ground the neighbourhood of a marshy nature, still the Commissioners satisfied themselves that ground water was at all points close to the surface, and that a few superficial scratches only were sufficient to show the level at which water stood. The rise and fall of the ground water munity who sympathise with Mr. Fleming and has been and is considered by most investigators [of malarial poison in malarial districts. That this element was present in the district complained of in the latter end of 1887, more than it is to day, is plain. Now, new roads, new levellings, new houses and sites for houses have been made, and the condition and configurationof the district has been completely changed That good has been done thereby there cannot be the possibility of doubt, and the only part complained of to-day, is a piece of unoccupied ground above Rose Villas which remains in the ands of Government I agree that lately fever has been at a minimum in the Western District and I ascribe to the freeing of the ground water by the numerous improvements, the beneficial results obtained.

II. The second Recommendation, that period of earth-outting be regulated, was intended to apply to the colony generally. The Commissioners reported very strongly upon this and took the stand-point that human lives were more precious than dollars, and that the land-owners themselves would be the first to adhere to the humane text. The only reason why the period cannot be regulated can only be from the standpoint of money, and, as yet, with even the Praya Reclamation scheme in view. I see no reason to budge from the belief that the enforcement of the recommendation would be a public benefit. As a corollary to the confuting this Recom mendation of the Commissioners, the Hon. th Surveyor-General suggests that a thorough investigation of malarial poison ought to be made. Linfer he manns in Hongkong. Now, this germ must exist in all malarial districts on the face of

the earth, and has been and is being searched for by many man "having the indispensable leisure and scientific attainments" demanded by the Hon, the Surveyor-General. That germ has not yet been pronounced upon, although all the Universities of Southern Europe have been closely engaged thereat, and in India the Go vernment for many years past have dealt with the subject fully, scientifically, and experiment-

I record this to deter, if possible, the Govern ment running into useless expense by establishing a bacteriological station in Hongkong for the investigation of the bacteriology of malaria, without duly considering that the ground has require while young to be kept free round their been gone over as thoroughly as human skill can, a Europe, India, and America. 111.-Towards the end of his report, the Hon. Surveyor-General remarks that he has

"very little doubt that one of the chief causes the upper levels in the western district may be staff the colony has under its pay .- Yours, &c., traced to the insanitary condition of the densely inhabited native guarters situated immediately below. In the unstable state of our sanitary knowledge, it is pardonable that conditions are viewed with different eyes, according as they are regarded from the point of an interested holder of land, or from that of a pure sanitarian. One feature the landlords in the western district do pride themselves on is that such a narrow strip of dwellings exists between them and the sea, and in their belief the health of the district cannot be affected thereby. Moveover, the native quarters exist to-day as they did in 1887 disturbances. and yet the fever has proctically disappeared. would venture therefore to state, that, the Commissioners were right, when after deliberation, they neglected to mention this element as being a source of infection. In conclusion, I would briefly state my be lieve to be that the improvement in the health

THE ACCIDENTS. TO THE EDITOR OF THE "DAILY PRESS." Sin,-I venture to think there are very few Englishmen in this Colony who do not feel hamiliated in the extreme by the performances of our Navy in these waters during the late mangenvres. I refer of course to the accidents that are so-disgracefully apparent to-day. To crown all, we cannot even keep our troubles to ourselves but must needs involve others in there the Imperiouse having fouled the Leipzig in goug to her buoy. For goodness sake le' u hear no excuses on the score of tides, towing of orpodo bonts, or the unweildy size of the ship. If these things were, they should have been provided against. Why could not the Imperience have gone right through the barbour and turned round where there was no possible chance of fouling anything and so to her buoy, thus saving us from being the laughing stockas we are now-of our dear friends the Germans, Russians, French, and even Chinese, who It is to be hoped that our officers, the least

THE ACTING GOVERNOR AND THE MASONIC FRATERNITY.

TO THE EDITOR OF THE "DAILY PRESS." ... DEAR SIR, -A propos of the miniature storm raised by the decision of the Acting Governor not to allow the laying of the foundation-stone f the Prava Reclamation to take place with Masonic ceremonies, I think it is only fair to remark that there is a large section of the comrespect him for his decision in this matter. Fersonally. I am neither a Roman Catholic nor .a. Freemsson, and would be indifferent as to whether the event took place with Masonic ceremonies or not, but I maintain that Mr. Floming. putting aside his private feelings altogether, has soted justly and considerately in omitting part of a programme which would give offence to the Roman Catholic portion of the community, who have as much a claim to be considered as the Masomic element. The latter, after all, are merely a section of the community, and to them the omission of the ceremony can be nothing more than a disappointment, whereas to a large number of residents in the Colony the

performance of it would amount to an actual It is impossible to please everybody, and Mr Fleming, in my humble opinion, has taken the right course under the circumstances, though it is only natural perhaps that the more rabid of the supporters of the Masonio coremony should give vent to their spleen in face of the disappointment.-I am, Dear Sir, yours truly.

TREE PLANTING. TO THE EDITOR OF THE "DAILY PRESS." Sis.—At the meeting of the Sanitary Board ome discussion took place respecting coolie quarters. Householders will find it very much to their advantage to allow their chair coolies to reside off the premises and treat them like day labourers in England; besides, the coolies much prefer this arrangement. The Fever Commission was also discussed.

The subject of surface drainage was touched upon, but no mention was made of tree planting. To my mind this is of great importance, and since sam of \$23,030 is down in the Estimates for the year 1890 for the expense for the Botanical Gardensand Government Plantations, and we have a Superintendent and an Assistant Superintendent besides a considerable staff. I think with advantege to the residente of Victoria more trees might be planted in the immediate neighbourhood of the dwelling houses. A considerable amount of drainage may thus be offected and the air purifled by the foliage, to say nothing of the appearance of well kept trees. The trees when planted roots from weeds and an occasional top dressing given. Most of the trees planted in this colony are left to take their chance when once they leave the nursery. . The work or expense entailed by such attention amounts to nothing and cerof the unhealthiness of the detached houses on tainly should not be omitted considering the
